Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or teach an aircraft auxiliary equipment precision alignment system comprising an auxiliary equipment mount attached to the aircraft with an internal reference unit having a means for removable attachment to an in-service avionics tray on board the aircraft, a locating assembly having means for precision engagement with the auxiliary equipment mount, the locating assembly further having a mating means adapted to receive the IRU and a means for mote operation of the IRU.

Durbin et al. discloses an adjustable mounting tray for installation of an aircraft gyroscope and inertial reference apparatus comprises a base plate member mounted to that it is substantially level in a roll and pitch on the equipment shelf or rack of a leveled aircraft. A top plate or tray member is pivotally mounted on the base plate for azimuthal adjustment. The aircraft is pitched up or down and the top plate retated in azimuth to remove any roll/yaw cross-axis coupling thereby assuring precision longitudinal axis alignment, but fails to show a locating assembly further having a mating means adapted to receive the IRU and a means for remote operation of the IRU.

Pease (5,190,241) discloses an avionic tray for supporting an avionic equipment box, but fails to disclose a means for remote operation of the IRU or an extension cable assembly for operatively connecting the locating assembly to the avionics tray for remote operation of the IRU.

Art Unit: 3663

Therefore, in light of the novel disclosure provided for by the present invention, the present claims have been deemed as patentable over prior art relating to avionics trays on an aircraft

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
